

I need the weather on XM radio because I drive a lot of miles everyday local and long distance and can not get weather up dates from the regular radio stations. There are a lot of areas that the regular stations don't come in when I am on the road between towns. I think it is my right to listen to what I want to and not what you think I should. The USA is supposed to be the land of freedom. Its not if you think you can tell us what we can listen to.

Thank You  
Robert Peck
